### [Top ten FT8 advantages for slackers](#)

You have time to visit the restroom without missing any contacts.

[K0NR](#)

### [All about RF coaxial cable connectors](#)

Many standard connector formats, such as the D-type connectors and many other multiway connectors consist of a series of pins with connections in parallel to each other. RF connectors are typically very different and have some rather different characteristics.

### [2019 State of the Hobby Survey](#)

This benchmark can help us determine what is working and what is not in the ham radio community. This can involve participation, recruitment, mentoring and licensing. It can also help identify new and emerging trends in amateur radio. Please take a few minutes to complete the survey and share with others in the hobby.

### **3D printed telegraph**

To actually put a key to use, you need a telegraph sounder on the receiving end to “play” the messages.

[Hack A Day](#)

### **Pistol crossbow antenna launcher**

Generally, the higher you can get an antenna, the better off you will be.

[Soliloquy Blog](#)

### **Flooded batteries for off grid radio, revisited**

Regular maintenance on flooded batteries should be done at least twice a year, or quarterly if your batteries are cycled often.

[Off Grid Ham](#)

### **Radio fun: Monitoring ISS answering student questions**

The pass was high and mostly to my open south which meant it was one of the longest ARISS contacts I’m monitored.

[The SWLing Post](#)

## **Video**

### **Running two instances of WSJT-X**

A demonstration of two instances of WSJT-X, two radios, and two antennas. One computer.
